FIRE EXTINGUISHER MAINTENANCE

Follow Palmer's instruction for care and maintenance.
Rechargeable models must be serviced after every use.

MONTHLY

Make sure your Extinguisher is at operating pressure by checking the round pressure gauge on its head. Dry powder extinguishers must be gently rocked, top to bottom, to ensure that the powder inside has not compacted.

YEARLY

Fire extinguishers should be given a maintenance check once a year. Extinguishers must be checked periodically for weaknesses in the tank's construction. Have your extinguisher regularly serviced by a qualified service person. Your fire equipment professional is the ideal person to perform the annual maintenance because they have the appropriate servicing manuals, tools, recharge materials and the necessary training and experience.

DRY CHEMICAL REFILL P80.00 / LB

PALMER HALOTRON I

Environment Friendly Fire Extinguisher

MODEL	NET WEIGHT	UNIT PRICE
PH-1	1lb.	2,900.00
